

FIGI Symposium

18 May - 24 June, 2021

Introduction of ADIA : Achieving Trust and Accountability

Seungmi Choi

Marketing Director of RaonSecure

Organized by

THE WORLD BANK
IBRD • IDA

Committee on Payments
and Market Infrastructures

Opportunities & Challenges of Digital Identity

With Digital Identity,

1.7 billion more people
financially included

Up to **13 percent** of
Global GDP increase

Current Challenges

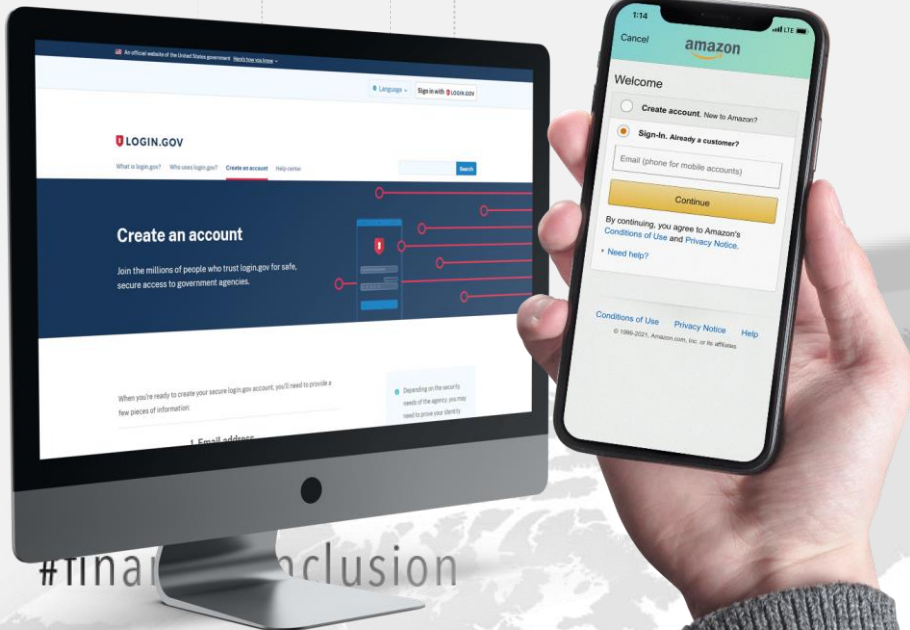

**Ownership of
Personal Identity
Information**

**Fragmentation &
Duplication**

Time to Establish Trust and Accountability

So far, online interactions have been
“account-oriented”

*Average number of online accounts per person
 = over 90*

Security & Privacy

- Cybersecurity
- Blockchain & SSI
- Privacy Laws

User's Accounts & Personal Data

Trust & Accountability

User

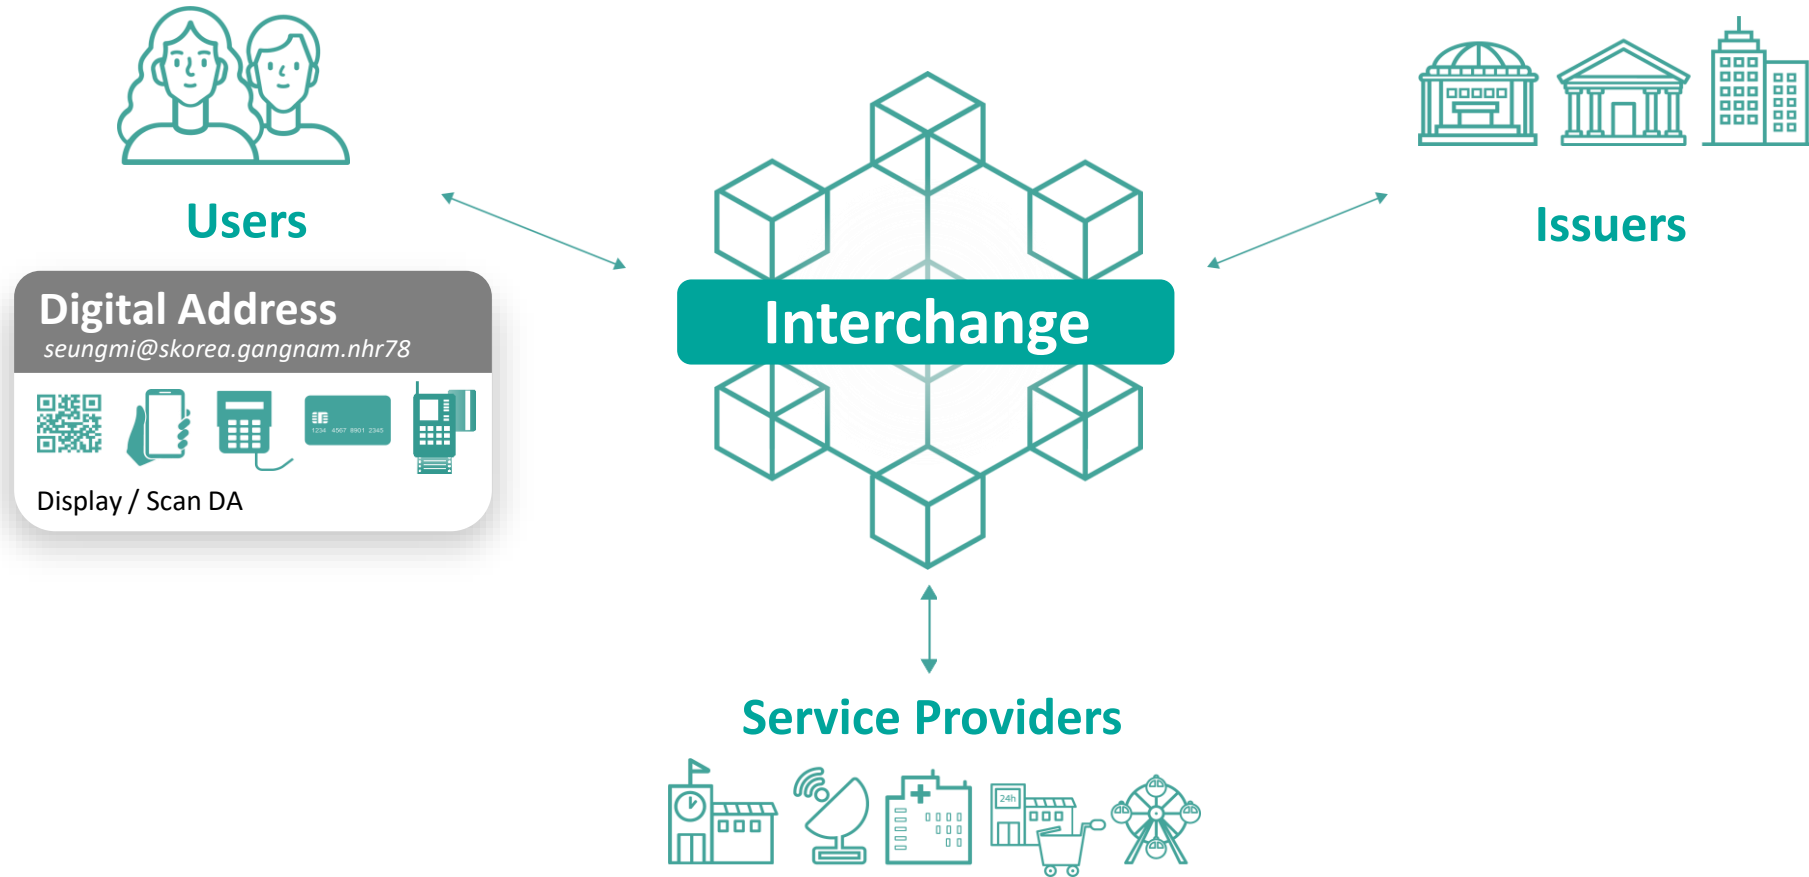

How do you know
 It's the right person and
 the ID is trustworthy?

ADIA Architecture

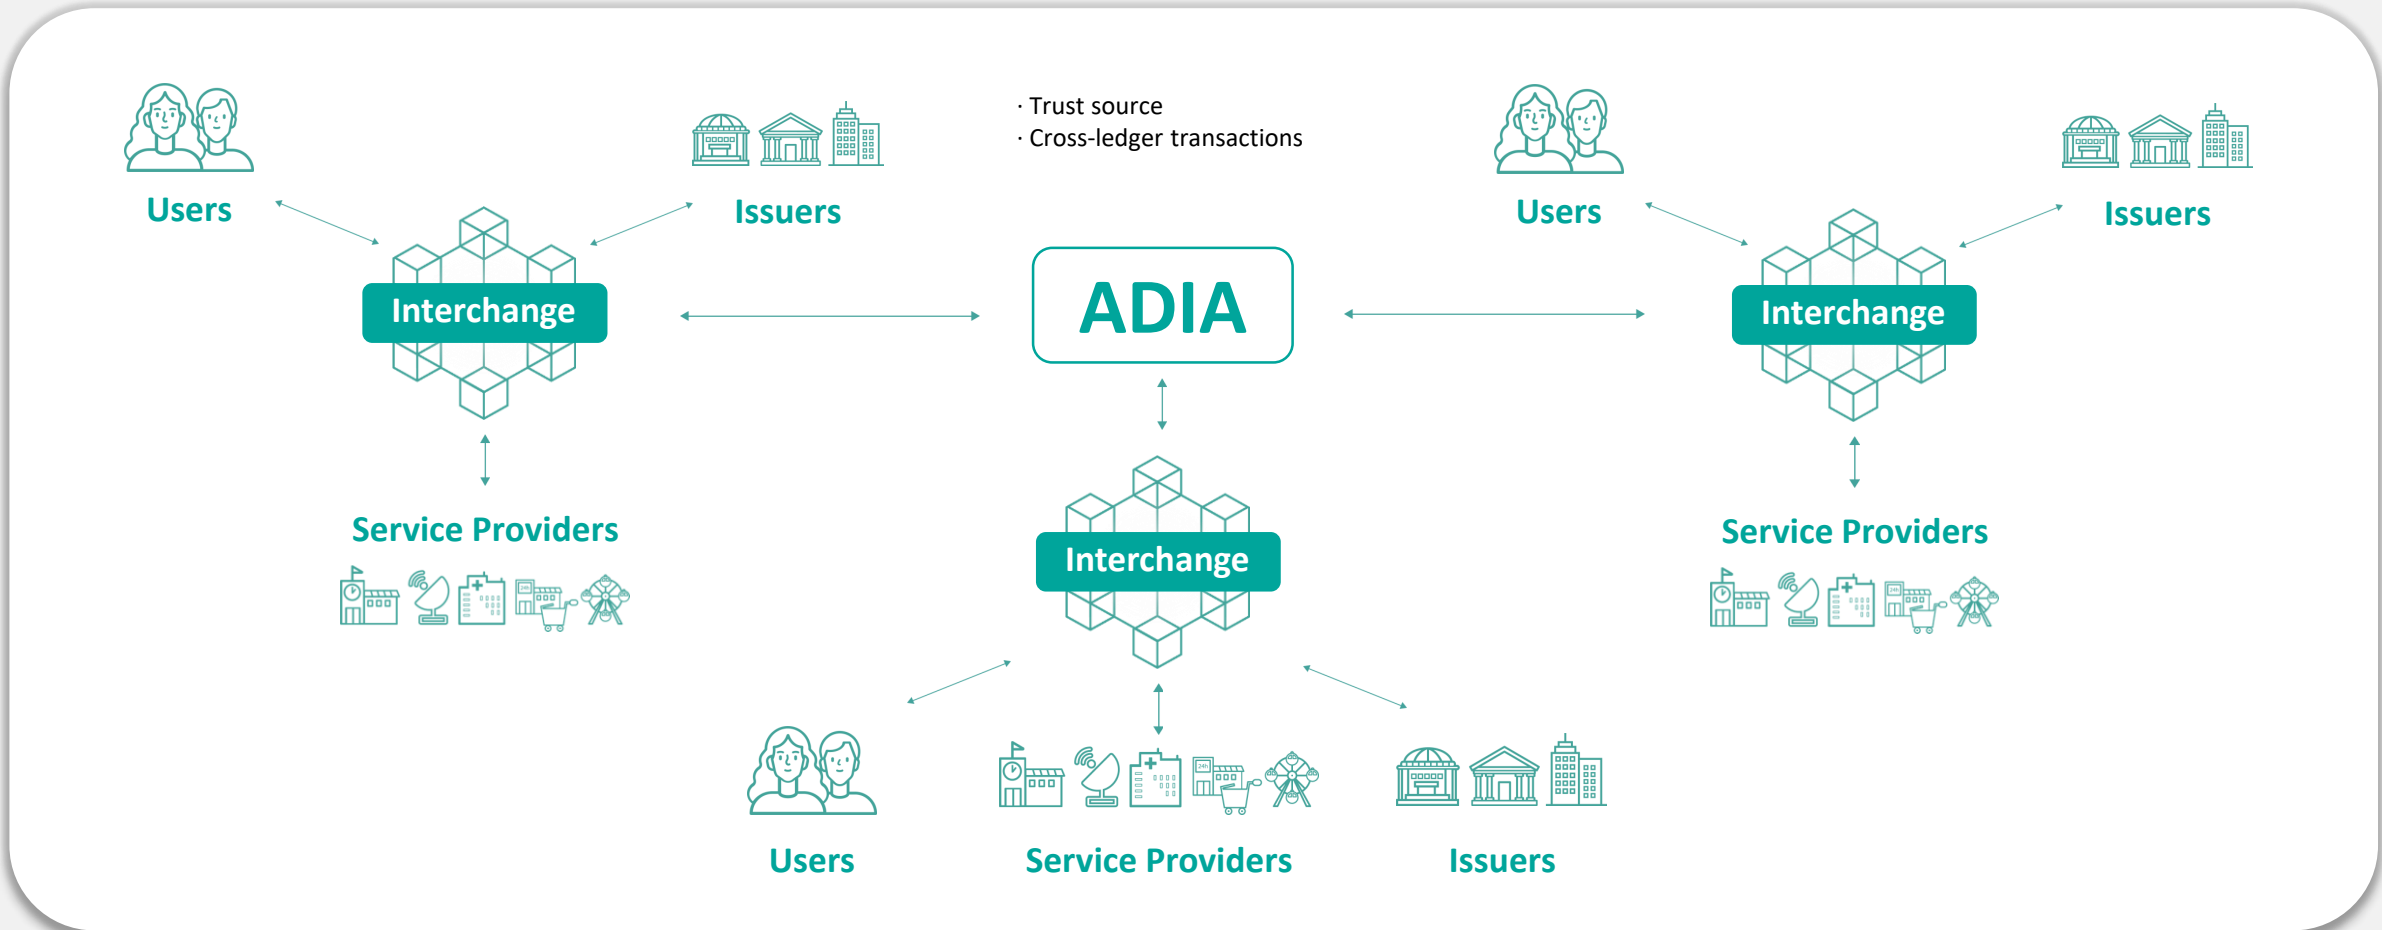

ADIA : Accountable Digital Identity Association

Main Objective : Providing Interoperability and Inclusiveness based on a Trust Framework

ADIA Architecture

Main Objective : Providing Interoperability and Inclusiveness based on a Trust Framework

Global Interoperability of ADIA Architecture

5 Core Principles of ADIA

**We Do Not Own
Personal Data**

**User's Consent for
Data Disclosure**

**Personal ID Data Remain
with Issuers Only**

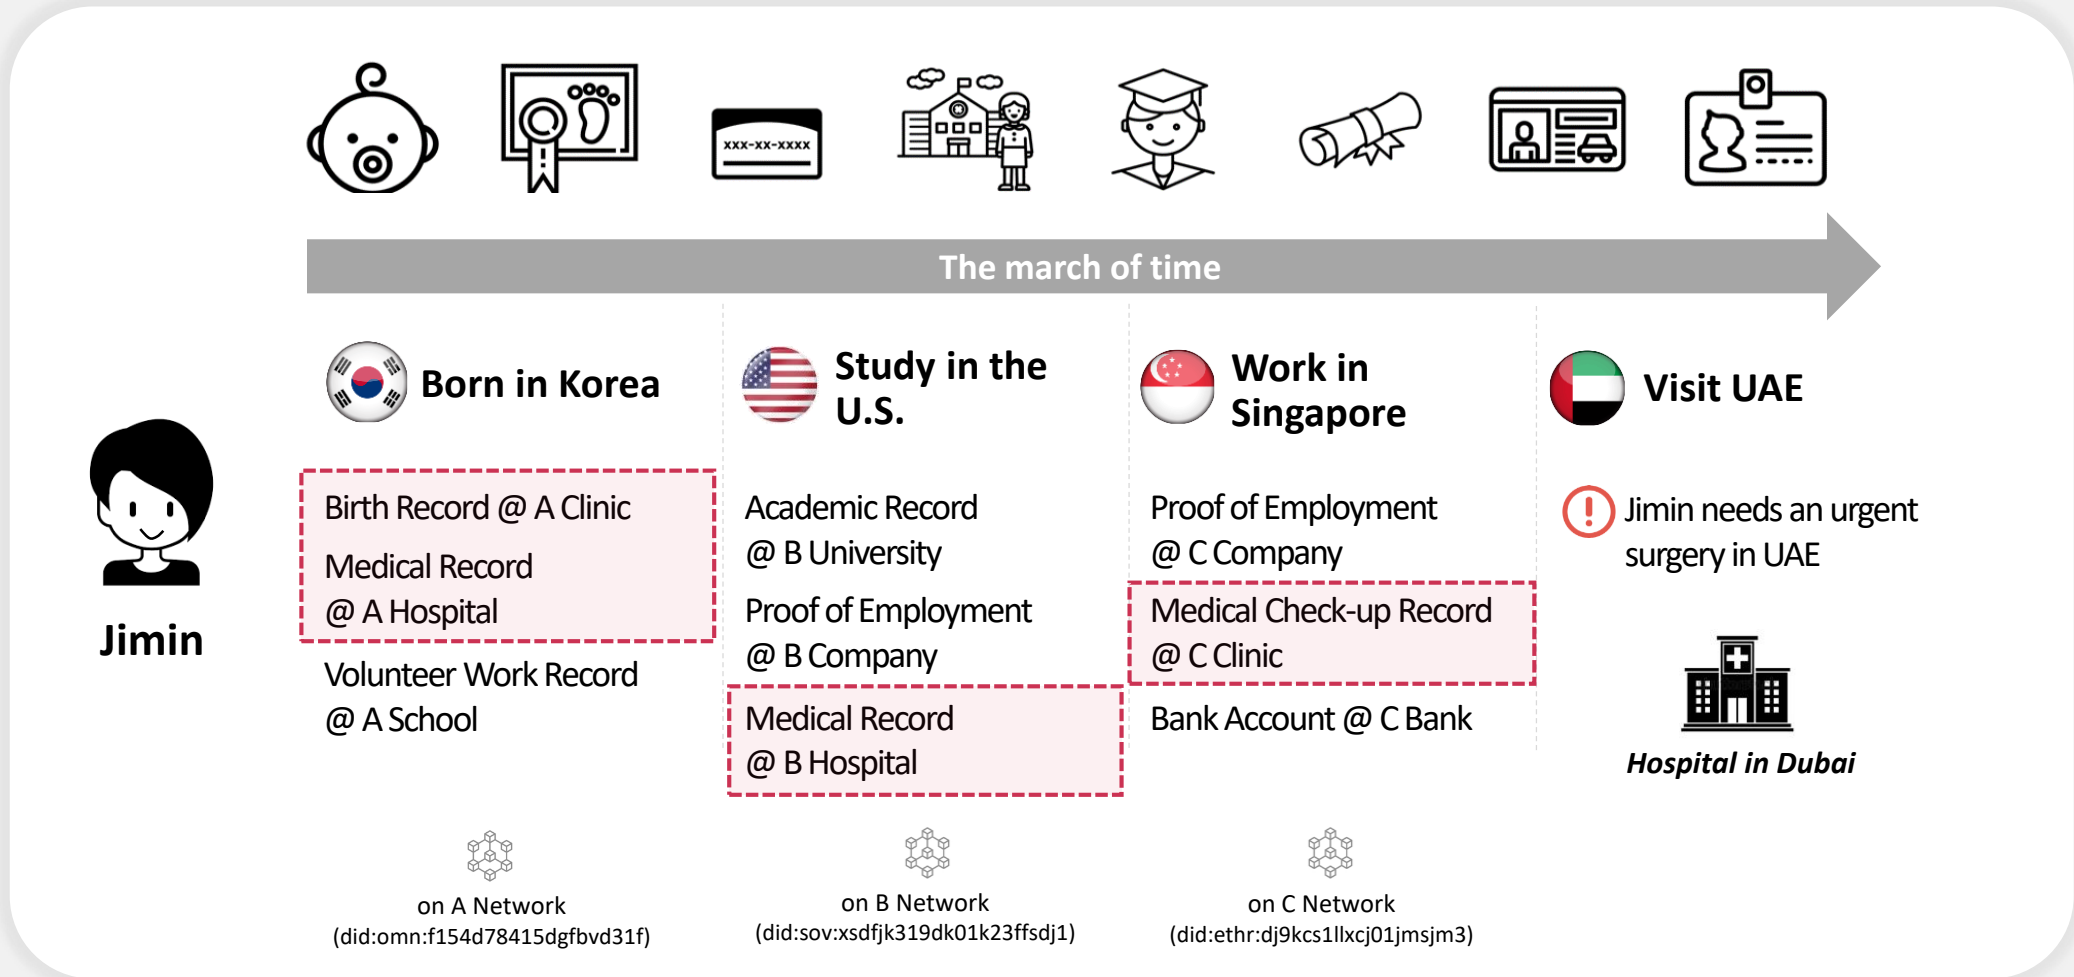

**ID Users & Issuers
Into the Value Chain**

**We Include All People
in Digital Identity**

Lifecycle of Identity with DA and ADIA Architecture

ADI Association Roadmap

Accountable
Digital
Identity | **ADI**
Association

The Accountable Digital Identity Association (ADI Association) is an open industry association created to drive the development of a standardized, interoperable framework for decentralized identity services to ensure the authenticity of, and to establish trust in, digital identities.
